La Mission

The Apache Software Foundation (ASF) is a US 501(c)(3) charitable organization.
Its mission is to provide Open Source software for the public good.
We do this by providing services and support for many like-minded software project communities of individuals who choose to join the ASF.

Un **espace neutre** dans lequel des projets Open Source **indépendants** de toute influence commerciale peuvent prospérer et produire des modules logiciels distribués sous forme de **code source ouvert** sous license Apache 2.0

La Suisse de l'Open Source?

"With hundreds of projects and thousands of committers, the Apache [Software] Foundation has found stunning success without knuckling under to the software titans

… unlike other open source organizations, the strength of the ASF is its independence from corporate interests

… this independence has created a safe haven for a burgeoning open source developer population."

— Matt Asay, InfoWorld

grep.codeconsult.ch

Home   Who?

The ASF is the Switzerland of Open Source

By popular demand (two people – that's about 100% of my readership!), here's an essay similar to my lightning talk of last week at ApacheCon: *The Apache*

CAT MYSELF | SORT | HEAD -2

Bertrand Delacrétaz here – my "résumé" will tell you more.

The opinions expressed here are my own, I'm not representing any group or company on this blog. YMMV.
