

# Open Source Software and Education

bertrand delacrétaz

[www.codeconsult.ch](http://www.codeconsult.ch)

egin seminar, november 2nd, 2006

What can  
Open Source software  
bring to education?

and vice-versa!

# Closed Source Software

Nice, isn't it?

image by shawnzlea at Flickr

You can play  
with it.

Don't open it.

Don't try to  
find out how  
it works.

# Open Source Software

Feel free to  
experiment!  
You can do  
whatever  
with it.

Some assembly required...

image by ckirkman at Flickr

# The Four Freedoms

Freedom to run the software

Freedom to study and adapt it

Freedom to redistribute it

Freedom to improve it

source: [gnu.org](http://gnu.org)

# Open Communities

It's not the code that counts  
It's the community

eclipse

Do You Use  
Open Source  
Software?

Open Source Software  
Runs The World!  
(more or less)

image: wikipedia

Students and  
Open Source  
Software?

Copying  
Open Source Software  
is LEGAL

Using  
Open Source Software  
is FUN  
(often)

Knowing  
Open Source Software  
is ESSENTIAL

Creating  
Open Source Software  
is a  
GREAT WAY TO LEARN

Students contributing  
to  
Open Source Software?

# Contributing by...

Creating examples and tutorials

Writing documentation

Participating on mailing lists

Testing and reporting bugs

Writing code

Designing software

Creating new projects

# XML course at comem.ch

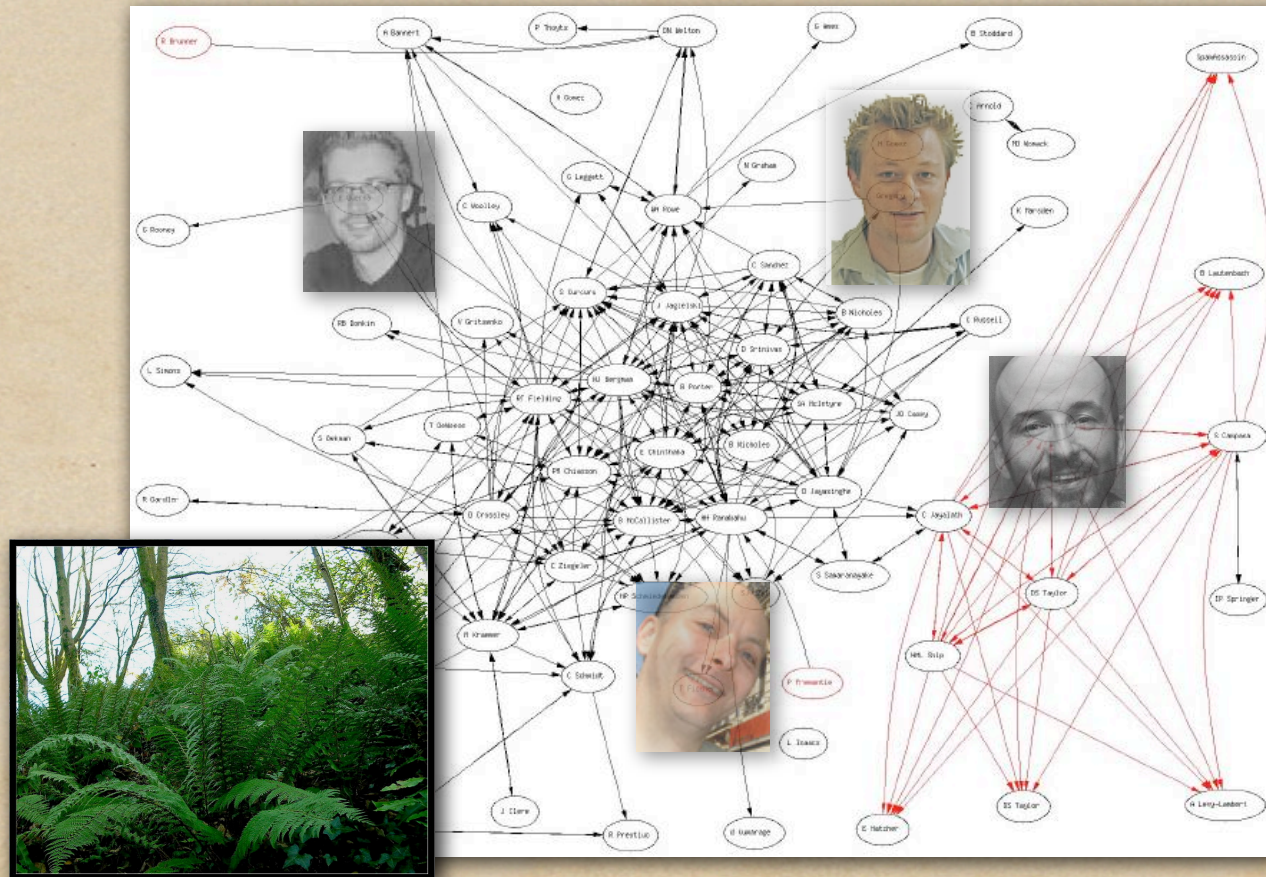

How to  
get started?

# Select a (useful) project

# Get to know the people

# Contribute..anything

Creating examples and tutorials

Writing documentation

Participating on mailing lists

Testing and reporting bugs

Writing code

Designing software

Creating new projects

# Motivate Students!

Conclusión..

# Open Source is Good

for teachers...

for students...

for schools...

..If they are  
actively involved in it!
